Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Farrall et al. See **figs. 1 and 5** and the last paragraph of column 6.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 6, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farrall et al in view of Kornrumpf.

Farrall et al clearly discloses the device in **figs. 1 and 5**.

The reference does not disclose a second substrate.

Kornrumpf discloses a second substrate in **fig. 2** for the purpose of providing a switch with three position.

It would have been obvious to one of ordinary skill in the art to modify Farrall et al to have a second substrate and second electrode for the purpose of providing a switch with three positions.

Response to Arguments

Applicant's arguments filed 25 September 2002 have been fully considered but they are not persuasive.

Claims newly added in Amendment A, paper #4 dated 25 September 2002, on page 6 have been renumbered to 6 and 7.

Applicant points out that tunable capacitors require precise control when compared to switches, but he fails to point out the structural differences between his claims and the devices disclosed in the references. There is no mentions of any control structure in the claims. As the claims now stand, the only difference between the prior art and the claims are intended use. Applicant correctly points to different concerns when constructing a switch compared to a tunable capacitor, but this is not a teaching away, but a confirmation that the same structure can be used for different uses.

With respect to the Kornrumpf reference, the reference was only used to show the use of a second substrate would have been well known. No other structural features in the device of Kornrumpf were used to modify Farrell et al. It is the Examiner's position, that taken as a whole, Kornrumpf would suggest to one of ordinary skill in the art to use a second substrate.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
